TO ARCHITECTS.

COMPETITION and other DRAWINGS.—Mr. THOMAS S. BOYS, Member of the New Society of Painters in Water Colours, and author of "The Picturesque Architecture of Paris, Ghent, Rouen, &c." and of "London as it is," offers his services in Tinting Backgrounds, Landscape, Perspective Views, Interiors, &c. From the long experience he has had in such subjects, he is fully aware of the points essentially necessary to be attended to. Drawings and designs lithographed in a superior manner.—Address, Mr. BOYS, 9a, Albany-street, Regent's-park.

DECORATIVE PAINTING.—Mr. FREDERICK SANG, from the Royal Academy of Munich, DECORATIVE ARTIST in FRESCO, and in all other manners of Painting; whose works may be seen in the principal public buildings of the metropolis, begs to inform his patrons, and Architects in particular, that he has considerably increased his Establishment, and is now enabled to undertake, on the shortest notice, the embellishment of private and public buildings, in any part of the United Kingdom, on the most reasonable terms, and in any of the Classical, Mediæval, or Modern Styles.—Apply to F. SANG, Decorative Artist, 58, Pall-mall, London.

TO BUILDERS AND OTHERS.
SURELY, BUILDERS KEEP HORSES; few, indeed, are those who do not. See, read, and be convinced. HORSES FORAGED, at one-half the usual expense.—See MARY WEDLAKE'S PAMPHLET on Oat-bruising, Straw-cutting, and steaming of Food. Hundreds a year saved by large farmers, and 50l. to 80l. a year by small keepers of horses, and no mistake; for their cattle will do as much work again, and be in much better condition. Down with the rack!—15, Fenchurch-street; and also 11, Tavistock-street, Covent-garden, where an oat-bruiser may be seen at work. A pamphlet sent post-free on receiving twelve postage stamps.

THE ARCHITECTURAL QUARTERLY REVIEW will contain Reviews of Books and Notices of Literary, Illustrative, Structural, Decorative, and Mechanical Works having relation to the Theory and Practice of Architecture and Building, and to the Study and Profession of the Architect.—Prospectuses at the Publisher's.—Advertisements on or before the 23rd inst.
GEORGE BELL, 186, Fleet-street (next St. Dunstan's Church).

THE BOARD OF HEALTH SURVEYORS, &c.
WILLIAMSON'S SECTIONAL LINES (engraved by WATERLOW and SONS), divided into 8ths, 10ths, 12ths, 16ths, 20ths, and 32nds of an inch, in figures of 12 inches by 18, and 18 inches by 8. Tracing papers, mounted drawing-papers, and every article for the use of Surveyors, Architects, Engineers, &c.—WATERLOW and SONS, Stationers, Lithographers, Printers, &c., 59 to 65, and Carpenters'-hall, London-wall.

PASCAL'S PATENT FUMIVORE and SELF-ACTING VENTILATOR.—The attention of the public is respectfully directed to this truly valuable Invention. The extensive arrangement of this apparatus entirely obviates the inconvenience and annoyance of smoky chimneys, arising from any cause whatever. It is also adapted to all purposes of sanitary ventilation, particularly in places of public resort, schools, chapels, barracks, banks, large retail shops, hospitals, taverns, ships' cabins, and such other place where gas is consumed or close stoves are in use. It obviates the necessity of all chimney-shafts or high tubes.—For further particulars apply to Mr. SEPTIMUS BRAITHWITE, 108, Great Russell-street, Bloomsbury, London, where contracts may be entered into for the warming by improved methods, and ventilation of any building.

REVOLVING SAFETY WOOD and IRON SHUTTERS.—SNOXELL, Patentee, 98, Regent-street, and at his Steam works, 135, Old-street. These shutters have fully borne out their superiority over either revolving shutters for security, durability, and simplicity. References can be given to noblemen whose mansions are fitted herewith, and numerous large establishments, where some are fixed measuring upwards of 600 square feet in one shutter, and which are opened and closed in a few moments with the greatest possible ease, without the use of machinery. The Patentee manufactures Brass sash Bars, Bead Bars and Plates, &c.

REVOLVING SHUTTERS.—CLARK and Co. invite the attention of architects and builders to their improvements in REVOLVING SHUTTERS of IRON or WOOD. Having completed new and improved machinery for the manufacture of revolving shutters, they are enabled to offer a superior article at a reduced price. Manufacturers of improved DRAWN ORNAMENTAL METALLIC SASH BARS, brass mouldings, stall-board plates, door-plates, &c. Engravings in the first style of workmanship. Messrs. C. and Co. having fitted up extensive works, will feel a pleasure in forwarding the credentials of architects and others having them in use, on application. Steam engines, saw benches, and machinery of every description, and iron work connected with buildings, paving, horse, and mirrors.—CLARK and Co., Engineers, Tunnel Iron Works, 320, Wapping, London.—City Office and Show Rooms, 71, Chancery-lane.

BUNNETT and Co., ENGINEERS, Patentees and Manufacturers of REVOLVING IRON AND WOOD SAFETY SHUTTERS, and of ORNAMENTAL SASH BARS, MOULDINGS, STALL-PLATES &c. FOR SHOP-FRONTS, AND OTHER WINDOWS, ON STYLISH IN BRASS, COPPER, ZINC, IRON, &c. Shop-fronts completely fitted up and glazed with plate glass. Metal works and improved machinery of all kinds for warehouses, hoisting-houses, &c. BUNNETT and Co. challenge competition as to either quality or price. Office, 36, Lombard-street, London; Works, Deptford, Kent.

B. and Co. are also Patentees and Manufacturers of Improved Bench and Flooring Cramps for Builders; Wrought Iron Diagonal Gratings, double-trapped self-acting Water Closets, and self-acting and self-cleansing Edinburgh Traps, for Sewers, Drains, &c. &c.

PREVENTION of FIRES.—The attention of those who are interested in building is earnestly invited to a METHOD OF CONSTRUCTING THE FLOORS, CEILINGS, & ROOFS OF HOUSES ON AN IMPROVED FIRE-PROOF PRINCIPLE, THE ADOPTION OF WHICH SECURES MANY IMPORTANT ADVANTAGES, AT A COST NOT GREATER THAN THAT OF THE COMMON MODE OF BUILDING WITH TIMBER.

This most desirable object is attained by the substitution of incombustible materials, chiefly iron and concrete, in the formation of the floors and roofs; thereby superseding the use of timber joists &c., but retaining or not, as may be desired, a finished boarded surface for the floors.

From the published investigations of the most competent authorities, it would appear that no house in which timber joists are used is practically secure from the danger of fire; but no method of fire-proof building yet introduced has been available for ordinary domestic buildings on account of the expense. This difficulty is now so entirely removed by the introduction of an improved method of construction, that it is a simple matter of choice whether a building shall be fire-proof or not. Compared, indeed, with the ever-recurring destruction of timber floors, the fire-proof method exhibits considerable economy, and the total cost of a building will be still further reduced when the roof is constructed on the improved fire-proof principle, which, so far from being merely theoretical, has proved its superiority by a trial of seventeen years; and it not only affords perfect security from the ravages of fire, but insures greatly increased strength and durability to the building, together with freedom from the attacks of dry-rot, and from the annoyance of insects and vermin, for which there is no harbour.

For the object to which public attention is now so generally directed,—viz., the construction of improved dwellings for the labouring classes,—this system is peculiarly applicable; for when it is considered that several hundred individuals will generally be encompassed under one roof, and in a building probably five or six stories high, it is fearful to contemplate the sacrifice of life which may occur in the event of fire.

The Metropolitan Association, established for this object, have availed themselves of the advantages of this system in the construction of a large block of dwellings for sixty families, just completed in Spitalfields; and several large recently lunatic asylums, workhouses, private mansions, dwelling-houses, offices, &c., are also either completed or in course of erection, indicating a wide and extensive appreciation of the advantages of this improved plan of building.

A pamphlet fully descriptive of the system, and all further information, may be obtained on application to the proprietors of the patent.

Messrs. FOX and BARRETT,
46, LEICESTER-SQUARE, LONDON.
